Brooklyn, NY 11233

www.samueldelesque.me

I founded a startup during my last year of college (**Pixyt**) in France and built a framework from the ground up.
My interest in the field then led me to the Copenhagen startup scene where I worked for a fast growing company named **Volt**.
From there I decided to move to NYC and started work in a digital agency in Dumbo (**Domani Studios**).

Now looking to challenge myself with rapid front-end development, mobile and new technologies that are built to scale (Node.js, NoSQL, MEAN stack or custom built).

Expertise

Languages: Javascript, PHP

Databases: MySQL, MongoDB

Markup: HTML, Less, Sass, CSS, JSON
